Course Name

Course Name	:	Java Springboot
Date	:	13 February – 24 March 2023
Type	:	Enigma Fast Track
Batch	:	6
Instructor Coordinator	:	Tika Yesi Kristiani
Instructor	:	Doni Octavian
Instructor	:	Anisa Nur Rohkmah

The assessment of the Java course consists of two parts. They are assessment of technical ability, and assessment of disciplinary aspect.

Assessment of technical ability is obtained from each assignment or challenge given by the instructor to be done by trainees outside the training process hours. This assignment or challenge is given every time the instructor finishes discussing the sub-section of material in the syllabus.

Assessment of disciplinary aspects comes from absences. Attendance is done twice a day. Any delay will reduce the disciplinary points. The number of points that will be deducted from each delay depends on whether the trainee has given information to the instructor before the training process takes place and how long the delay will take.

Assessment of class participation aspects is the amount and weight of communication between trainees and instructors during the training process. Questions about the material presented, the ability to answer questions, the ability to present work results, complete the material information submitted by the trainer, correct and answer questions from other trainees are the determining factors for the points of class participation.
